### To whom it may concern

I have worked with Michael Pass for over 10 years now. I had Proguardplus applied to boats and cars for various years. I had test patch applied to my previous vessel when ZYTEXX was in testing for 12 months. It was amazing to see the difference between ZYTEXX covered area staying pristine white while the rest of the hull was becoming grey and black over time.

We had applied ZYTEXX on MY RoMa last year before the season on the waterline and worst areas on the hull. The result was so amazing that we had most of the hull done this spring.

Zytexx makes you look good, gives the mirror like finish on covered surfaces and endless protection. Deck crew loves the product as it makes it so easy to keep the boat clean.

Now when we see a boat with grey or black stains on the hull we all think **THEY DO NEED ZYTEXX** and if you are reading this testimonial is because you most probably need it too.

The owner is very impressed and pleased by the improvement of appearance of paint system after application of ZYTEXX on the hull and Proguardplus on superstructure.

The build project manager has told me that she looks better now than when she left the yard new in 2010.

I am proud of the way RoMa looks now and it is all thanks to Proguardplus team lead by Michael. Thank you guys and see you this winter for some more work.

Janusz Walinski  
Captain  
MY RoMa
