Zytexx Testimonial

Dear Claire,

This is a short letter of gratitude for the work and support Proguard have shown Vibrant Curiosity since our first test application of the system exactly two years ago.

At that time the Owner was looking at various product options to extend the lifetime of the paint system onboard. As a world traveller Vibrant Curiosity has now sailed just shy of 100,000 NM's since launch 5 years ago.

We subsequently trailed three systems, of which Zytexx proved to give by far the best results after the season.

From this initial trial the Owner has invested further in the Zytexx system, which has now been applied to all the yachts exterior vertical surfaces. The Proguard team that polished and applied the ceramic system have always been thorough, professional and courteous.

In the year since it's full application we've been extremely pleased with the high gloss levels. From a maintenance standpoint, it's very time efficient to the wash down process, needing minimal effort to keep the yacht in 'as new condition'.

The warrant of two years has proved itself and we'll only need to touch up the wear areas on the yachts hull when required.
